### Diagram

- The diagram shows the temperature and depth variation over time.
- The data points are marked with dots and lines connecting them.
- The x-axis represents time, with 10:00 to 11:00 marked.

The table above represents data collected from a field study, likely related to hydrology or geology, given the presence of depth measurements and geographic coordinates. The data could be used to analyze water levels or geological formations over time. The graph on the right side of the page might depict a trend or change in the data, possibly indicating variations in depth or other environmental factors.
