World Data Center System

Data constitute the raw material of scientific understanding. The World Data Center system works to guarantee access to solar, geophysical and related environmental data. It serves the whole scientific community by assembling, scrutinizing, organizing and disseminating data and information.

The World of Geo-Data

The physical, chemical, and biological processes that shape the world are complex and interdependent. To understand them requires observations with sufficient *spatial and temporal resolution and coverage* to characterize the phenomena of interest ...

Therefore, the **lifeblood of Earth sciences is observational data**, sometimes global in coverage, and taken repeatedly over time.

IODE is...

The IOC's International Oceanographic Data and Information Exchange (IODE) was established in 1961 to enhance marine research, exploitation and development by facilitating the exchange of oceanographic data and information between participating Member States and by meeting the needs of users for data and information products.

NODC
National Oceanographic Data Center 

The National Oceanographic Data Center is a national repository and dissemination facility for global oceanographic data which acquires and preserves a historical record of the Earth's changing environment to be used for operational applications and ocean climate research.

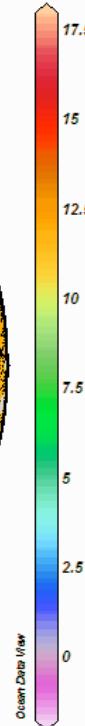

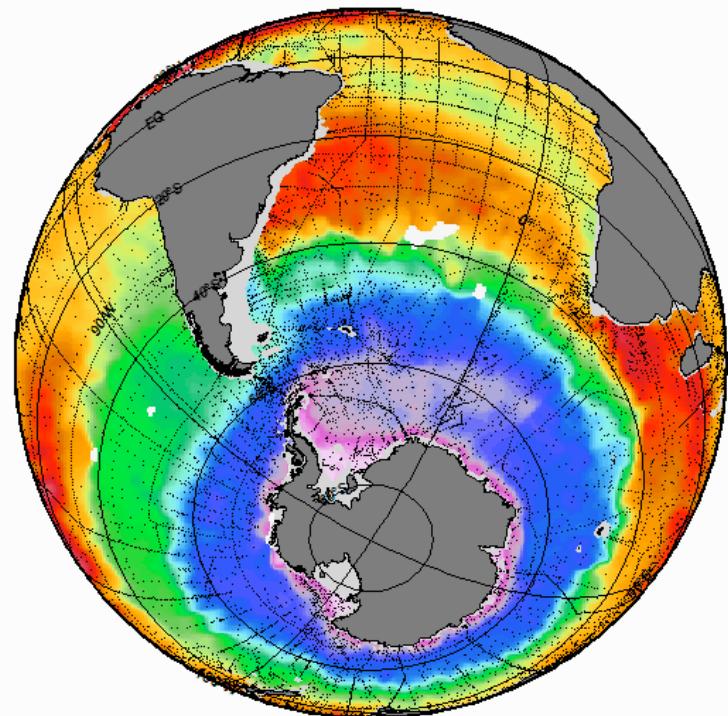

NODC is an organization made up of the Oceanographic Data Center, [National Coastal Data Development Center](#), [World Data Center for Oceanography](#), and the [NOAA Central Library](#) which are integrated to provide access to the world's most comprehensive sources of marine environmental data and information.

Carbon Dioxide Information Analysis Center

The Carbon Dioxide Information Analysis Center (CDIAC) is the primary climate-change data and information analysis center of the U.S. Department of Energy (DOE). CDIAC is located at DOE's Oak Ridge National Laboratory (ORNL) and includes the [World Data Center for Atmospheric Trace Gases](#).

CDIAC's data holdings include records of the concentrations of carbon dioxide and other radiatively active gases in the atmosphere; the role of the terrestrial biosphere and the oceans in the biogeochemical cycles of greenhouse gases; emissions of carbon dioxide to the atmosphere; long-term climate trends; the effects of elevated carbon dioxide on vegetation; and the vulnerability of coastal areas to rising sea level.

CDIAC provides data management support for major projects, including the [AmeriFlux Network](#), continuous observations of ecosystem level exchanges of CO₂, water, energy and momentum at different time scales for sites in the Americas; the [Ocean CO₂ Data Program](#) of CO₂ measurements taken aboard ocean research vessels; DOE-supported [FACE](#) experiments, which evaluate plant and ecosystem response to elevated CO₂ concentrations, and [NARSTO](#), which assesses ozone and fine particle processes in the troposphere over North America.

Earth System Science Data (ESSD)

Chief Editors: David Carlson & Hans Pfeiffenberger

Open Access – Public Peer-Review & Interactive Public Discussion – Personalized Copyright under a Creative Commons License

Included in the [Directory of Open Access Journals \(DOAJ\)](#) as well as in the [Bodleian Library \(UK\)](#), [Deutsche Bibliothek \(D\)](#) and [Library of Congress \(USA\)](#). Long-term e-archived in [Portico](#).

Aims and Scope

Earth System Science Data (ESSD) is an international, interdisciplinary journal for the publication of articles on original research data(sets), furthering the reuse of high (reference) quality data of benefit to Earth System Sciences. The editors encourage submissions on original data or data collections which are of sufficient quality and potential impact to contribute to these aims.

The journal maintains sections for regular length articles, brief communications (e.g., on additions to datasets) and commentary, as well as review articles and "Special Issues".

PEINLICHE PANNE Schrift:

Nasa hat Mondlandungs-Videos verbummelt

Es klingt wie in einem schlechten Film: Die Kassetten mit den Bildern der ersten Mondlandung sind weg. Nasa-Mitarbeiter haben über ein Jahr nach den Videos gesucht - und sie nicht gefunden.

Received 23 March 2001; revised 20 April 2001; accepted 5 May 2001. Available online 20 September 2002.

Abstract

PANGAEA is an information system for processing, long-term storage, and publication of georeferenced data related to earth science fields.
